V-STACK[®] **620**

Introducing the V-Stack 620, meticulously designed for medium-scale packers who prioritize precise, fully automated stacking. Building on the strengths of the V-Stack 618, such as an inspection platform, it features an automatic pallet transport system with a pallet dispenser, ensuring seamless operation from start to finish. Embrace unparalleled efficiency with its innovative technology, facilitating swift and consistent product placement while eliminating manual labor. Experience the pinnacle of Dutch-engineered automation.

Fully automatic palletizing
from infeed to full pallet

High-level infeed
for smooth product flow

High stacking quality
for clean uniform pallets

Low maintenance
with maximum uptime

Palletizing Solutions

How it works:

Product Infeed

The product infeed loads the products into the manipulator for further handling.

Orientation and Positioning by Manipulator

The manipulator orients and positions the products on the formation doors between the collars.

Collar and Formation Doors

Optional electric compressing collars can press the formed layer, after which the layer is placed onto the pallet with vertical compression.

Stable Four-Sided Chamber

The stacked pallet remains within a four-sided optional chamber, maintaining the load position during stacking.
